

AquaAroma tank series

AquaAroma and AquaAroma Crema – optimised for mobile coffee machines

The AquaAroma and the AquaAroma Crema filter cartridges reduce carbonate hardness in drinking water and protect espresso machines and coffee machines against scale build-up. The filter material reduces the level of substances that impair the smell and taste such as chlorine.

AquaAroma filter cartridges are suitable for use in specially designed or retrofitted tank systems, and also for mobile coffee machines with an integrated water tank. They filter water while filling the water tank. Thus, the entire volume of the water tank is filled with filtered water.

With the AquaAroma Crema the taste can be optimised by adjusting the Aroma setting to the local carbonate hardness. The cartridge filters the water just before activating the brewing process.

The benefits to you

AquaAroma Crema

- Can be fitted in the water tank horizontally
- Water quality can be adjusted by using the Aroma ring – according to local water quality
- Constant water pressure and temperature during brewing

Pure coffee enjoyment

AquaAroma Crema

Filter cartridge suitable for use in coffee machines with specially designed integrated water tank systems (suction operation).

The Aroma ring of the AquaAroma Crema adjusts the filter performance perfectly to the local water conditions. To identify the right adjustment for the respective hardness, indicator strips will be delivered with every cartridge. AquaAroma Crema filter cartridges are suitable for use in coffee machines with specially designed integrated water tank system – the water is sucked through the cartridge. The food safety of BRITA Professional water filter products is tested and monitored by independent institutes.

	AquaAroma Crema	
Technology	Decarbonisation	
Dimensions Cartridge Pot	42.8/106.9/60.8 mm (W/H/D)	
Water intake temperature	4 - 30 °C	
Order number	101831 (Pack 1) 1001368 (Pack 60)	
Typical capacity – AquaAroma		
	Cups 35 ml	Cups 150 ml
	6,900	1,610
	5,190	1,210
	4,160	970
	3,470	810
	2,960	690
	2,570	600
	2,310	540
Typical capacity – AquaAroma Crema		
Aroma ring setting (bypass)	Cups 35 ml	Cups 150 ml
Level A	6,570 - 4,570	1,530 - 1,070
Level B	4,290 - 2,860	1,000 - 670
Level C	2,570 - 2,290	600 - 530
Explanatory notes	¹ The capacities given have been tested and calculated on the basis of normal application and machine conditions. Due to external influences (e.g. varying water quality, usage and/or machine type) deviations from these results can occur. ² Also recommended for a carbonate hardness >17°dH. Please note, however, that this will result in lower filter capacities.	

Only drinking water quality may be used as the water supply for BRITA water filters.
